EiKO® LIGHTING SOLUTIONS

More than light. We make it happen.

Since February 2026, EiKO Lighting Solutions, a subsidiary of **EiKO-Europe GmbH**, has been complementing the electrical installation and project implementation division.

As part of the strategic reorientation following the buyout of HC InnoTech GmbH, proven strengths such as high levels of project expertise, rapid response times and premium quality are being maintained and further developed within the international EiKO Group.

EiKO-Europe GmbH has been synonymous with high-quality lighting products and reliable distribution for many years. With EiKO Lighting Solutions, this expertise is complemented by practical on-site implementation.

The focus is on electrical installations and the realisation of modern lighting and energy concepts – from planning through to project implementation and professional commissioning.

For existing customers, this means, above all, continuity, experience and a stable corporate structure.

An overview of our services

Electrical installations
Implementation of complex lighting projects
Modernisation and retrofitting of existing systems
Project support and on-site technical assistance

EiKO Lighting Solutions stands for quality, reliability and practical solutions – all from a single source.
