EIKO-EUROPE GMBH

CASE STUDY

Darta (naturally green) – Reliable LED lighting for demanding production environments

Several of Darta's (naturally green) European sites rely on LED lighting from EiKO-Europe. The lighting solutions are used in both indoor and outdoor areas and are tailored to the varying requirements of industrial environments.

The food industry sets particular standards for lighting. Robust luminaires are required here that can be used reliably even in hygiene-sensitive areas and at low temperatures.

Thanks to its PC cover with shatter protection, the STAR Disc from EiKO-Europe is a high-performance solution for demanding applications. Its robust construction, high luminous efficacy and long service life ensure reliable operation in production and storage areas, as well as in deep-freeze zones.

The collaboration with Darta (naturally green) represents a long-term partnership and the delivery of bespoke lighting concepts at several European sites.

We create lighting solutions to meet the most demanding industrial requirements.

CASE STUDY | DARTA (NATURALLY GREEN)

STAR Disc
185lm/W

TECHNICAL HIGHLIGHTS

High light output

UP TO 185LM/W

Sturdy & durable

IP66 / IK08

PC-Cover

INCLUDES SHATTER PROTECTION

With a luminous efficacy of up to 185lm/W, an IP66 / IK08 protection rating and shatter protection provided by the PC cover, the STAR Disc is ideally suited to the demands of challenging production environments. Even in hygiene-sensitive areas and deep-freeze zones, the STAR Disc impresses with its robust construction and a service life of over 100,000 hours.

The result is an efficient, robust and durable lighting solution that meets the specific requirements of the food industry.
