

EiKO-Europe GmbH

Personal
Reliable
Professional
We take care!

Mission

We are your partner for bespoke, efficient and sustainable lighting solutions. Our aim is to support our clients from the very first idea and to deliver an optimal lighting solution that meets even the most demanding requirements.

**Personal. Reliable. Professional -
We take care!**

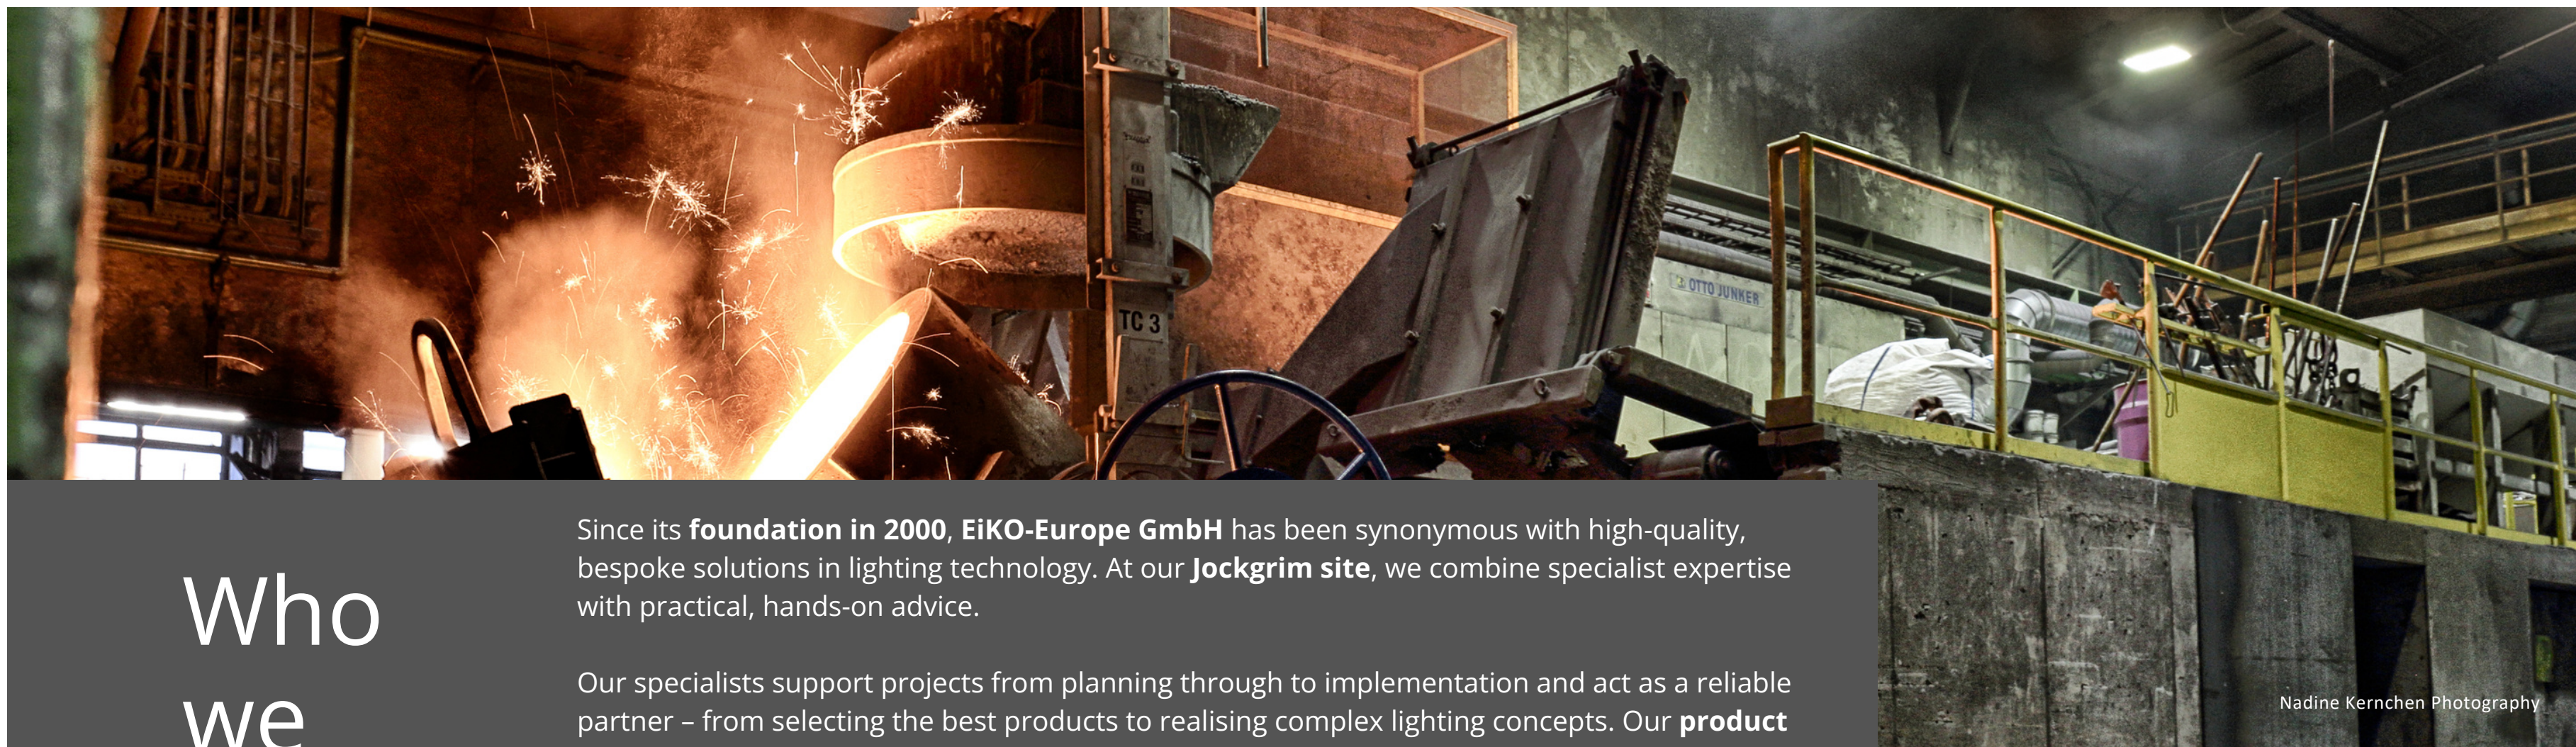

Who we are

Since its **foundation in 2000**, **EiKO-Europe GmbH** has been synonymous with high-quality, bespoke solutions in lighting technology. At our **Jockgrim site**, we combine specialist expertise with practical, hands-on advice.

Our specialists support projects from planning through to implementation and act as a reliable partner – from selecting the best products to realising complex lighting concepts. Our **product range** includes miniature lamps as well as high-performance industrial spotlights with outputs well in excess of 1,000 watts. We place particular emphasis on energy efficiency, sustainability and long-lasting solutions.

“Personal. Reliable. Professional – We take care!” is our company’s motto. Customised solutions and bespoke products are naturally part of our service offering, because lighting is our profession and our calling.

As a German company based in Jockgrim, we stand for regional responsibility and short decision-making processes. We supply customers in **Germany, Europe and worldwide**, with a focus on quality and reliability.

USP

Everything from a single source –
reliable and flexible.

Nadine Kernchen Photography

Closeness & Responsibility

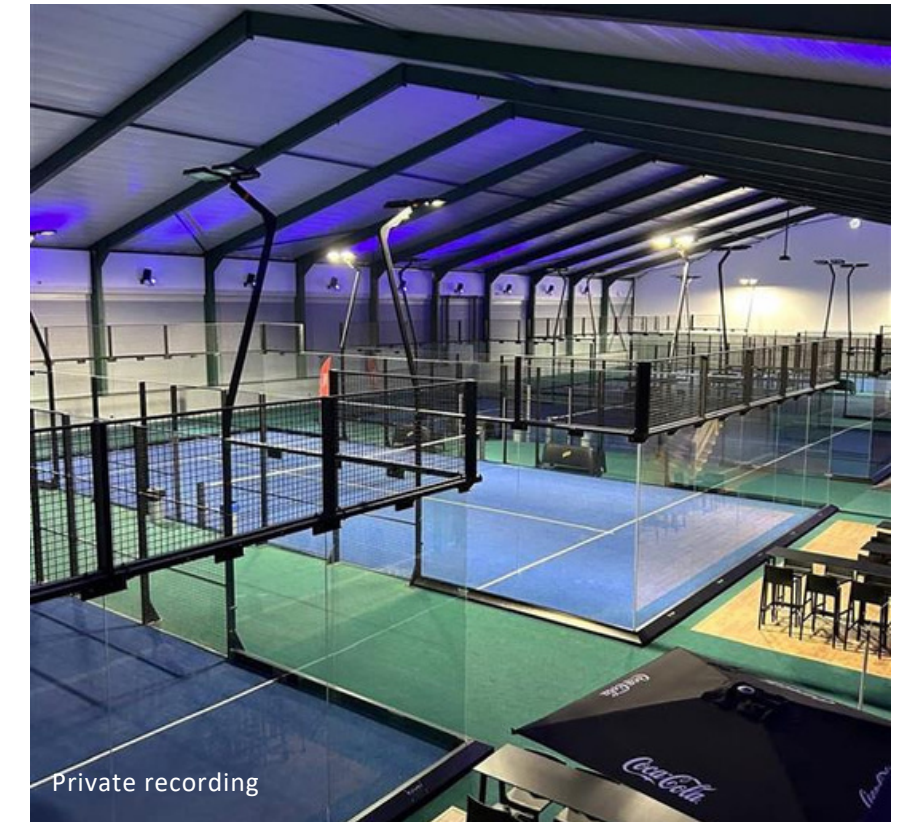

Our clients benefit from having a German-speaking point of contact throughout the entire project. The 'one face to the customer' principle, combined with geographical proximity and short decision-making processes, ensures clear lines of responsibility, direct communication and a high level of commitment.

Flexibility & reliability

We respond quickly and reliably to customer enquiries and adapt flexibly to individual requirements. Through clear processes, coordinated planning and rigorous monitoring of deadlines, we ensure that agreed deadlines are met throughout the entire supply chain.

Service & delivery expertise

We handle the coordination of delivery and customs formalities and ensure clear, transparent communication throughout the entire logistics process. Our service does not end with the sale, but also includes support after the project has been completed.
