PROFESSIONAL CHRISTMAS LIGHTING FOR COMMERCIAL AND PUBLIC AREAS

PLEASE NOTE THE FOLLOWING SAFETY INSTRUCTIONS FOR LED LIGHTING
The VDE Institute recommends the use of IP54 sockets outdoors to prevent water accumulation. Our lamps have been tested to IP44, but would also meet IP54 if complete sealing is guaranteed. Most of the products that have been returned have water accumulation in the base area. Since there is a voltage of 230V between the center contact and the base side, moisture in the socket can cause voltage flashovers and short circuits. This is a result of moisture in the socket and not a leak in the LED. We use high-quality brass bases that do not show any discoloration when used in a dry environment (tight socket system).

EiKO CHRISTMAS PROGRAM

Baden-Baden Christmas market with EiKO globe lamps/ Image credit: Nadine Kernchen

PROFESSIONAL CHRISTMAS LIGHTING FOR COMMERCIAL AND PUBLIC AREAS

LED bulbs in globe or standard shapes
in various designs (frosted, clear) with
glass or plastic bulbs are suitable for use
in string of lights to decorate trees,
facades, or entire buildings. Not only are
they shatterproof and weather-resistant,
our LED Christmas lights are also
extremely energy-efficient and durable.

For more than 20 years, we have been
supplying municipalities, associations,
facility management companies, and energy
providers with professional lighting that
creates an outstanding festive atmosphere.
Our globe lamps decorate numerous
Christmas markets throughout Germany,
and for several years now, they have been
creating a festive atmosphere on Germany's
most famous Christmas tree—right in front
of the Bundestag.
