

Lamps and luminaires are our business. Since 1978 EiKO Global has been providing high quality professional lighting products for industry, electrical trade, electronics sector, original equipment manufacturers and many other professional sectors.

We specialize in custom solutions for non-standard products. Our team of technical lighting designers, electrical engineers and lighting professionals will provide you with expert advice, optimize your lighting results and provide you with transparent amortization calculations and free lighting calculations.

EiKO-Europe GmbH, based near Karlsruhe, has been the European pillar of EiKO-Global for over 15 years now. Thanks to innovative lighting solutions and the consistent use of future-oriented technologies, EiKO has recorded above-average growth in recent years and is therefore regularly expanding our team.

**Are you looking for a new challenge?  
-Send us your unsolicited application-**

### **Your task**

Are you still looking for the right position?

Then send us an unsolicited application and convince us that you are the perfect fit for our team in Jockgrim!

### **Your qualifications**

Your qualifications will of course depend on the position to be filled. A degree or completed training is an advantage.

Do you have experience in the fields of lighting, electrical engineering, sales, logistics or commercial activities? Do you work independently, are you solution-oriented and can you fit in well with an existing team?

Then we look forward to receiving your detailed application!

## We offer

- A positive working atmosphere with a good team spirit
- Further training through regular product and specialist training courses
- Personal development opportunities through cross-departmental interfaces in an innovative, dynamic industry
- Experience in an international environment
- Company pension scheme
